

Lecture Series with Shova Lama

By Anantaa Thapa Ghimire, Grade-9

From grade six to above, it is a must for all to know about gender equality and equity. This topic covers a vast area in studies and carries a lot of knowledge. That is why to make this study easier on the 29th of August; Sunday Ullens School invited Ms. Shova Lama, an expert on gender issues who is presently working in “SAVE THE CHILDREN.”

This lecture series seemed quite interesting and unique since she added debates and activities based on gender equalities and equities in her presentation.

She shared her childhood memories and stories and she asked us about ours. And how our lives are different now compared to before.

She knew about a lot of cases regarding gender problems. She was of great help to both students and teachers. Many students interacted well and they gave their views too. To those who had confusions she cleared it without any doubts and we were answered.

We greatly thank Ms. Shova Lama for sharing her experiences and giving us more knowledge, idea and better understandings about gender equity and equality.
